

NEVAMAR LAMINATES ARE GREENGUARD CERTIFIED

:: ATLANTA, GA, NOVEMBER 8, 2005

Atlanta, GA, November 8, 2005 – The GREENGUARD Environmental Institute has awarded GREENGUARD Indoor Air Quality Certification to Nevamar® high-pressure decorative laminates and metal surfaces. The Nevamar laminates were scientifically tested to the GREENGUARD Standards for Low Emitting Products. Earning GREENGUARD Certification means that professionals and homeowners alike can trust the Nevamar decorative surfaces to create spaces free of harmful pollutants.

“Nevamar Company is committed to the environment and protecting our customers,” commented Joe Black, Nevamar’s North America Specifications Manager. “Our GREENGUARD Certification illustrates how much importance we place on the indoor environment and the health of our customers.”

Commercial, residential, healthcare and education project planners and specifiers can take advantage of Nevamar’s GREENGUARD Certified low-emitting surfacing without special ordering or extra cost.

The GREENGUARD Certification Program helps building, design, and specifying professionals and consumers create clean indoor air by providing an online guide to scientifically tested low emitting products and helpful tools and resources. Products certified by the GEI help to significantly reduce indoor air pollution. GREENGUARD also provides online, printable certificates for each and every GREENGUARD Certified Product to make project submissions simple.

About Nevamar

Nevamar Company is a leading diversified manufacturer of decorative surface products, including high pressure laminates, thermofused melamine panels, metal laminates, plus other specialty products used in commercial and residential interiors, fixtures and furnishings. For more information about Nevamar high pressure laminates and metal surfaces, visit www.nevamar.com or call 1-800-638-4380.

About the GREENGUARD Environmental Institute

The GREENGUARD Environmental Institute (GEI) is an industry independent, nonprofit organization that oversees the GREENGUARD Certification Program. As an ANSI Accredited Standards Developer, the GEI establishes acceptable standards for indoor products and testing protocols. The Institute’s goal is to improve public health and quality of life by helping manufacturers build better and safer products. The GREENGUARD Certification Program is the only industry independent certification program for low-emitting products. Access to the GREENGUARD Product Guide™, at www.greenguard.org, is provided at no charge.

For complete details, call 1-800-638-4380 or e-mail your request to nevamar.marketing@nevamar.com, or visit the Product Catalog section of our website.
