

Introducing TechLink™ by Watson Dispatch

TechLink provides **convenient, easy-access connectivity** for a keyboard, mouse, or other input devices and is fully compatible with all Watson Dispatch consoles. Offering **ten individual quick-connect points configurable to a user's requirements**, TechLink creates freedom to personalize the work environment while adding integrated cable management to **consolidate and maintain multiple technology wires**.

TechLink and all associated cables are installed by Watson certified personnel. Once installed, **the user can easily add, remove and rearrange equipment**. Simply choose the appropriate adapter, install a jack or coupler, and snap it into the modular window.

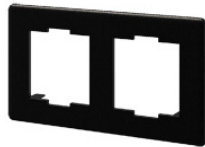

In addition to the standard connections included with TechLink, **optional adapter kits are available** for USB, data, phone, and audio devices. Kits include all jacks and cables necessary to connect TechLink to the source.

Description & Part Kit

The TechLink base unit comes with 5 adapter plate sets and 5 modular windows, yielding 10 configurable slots for customization. Its design allows full cable support when loaded and mounted beneath a console's primary surface. Built-in cable management features help consolidate and maintain technology cables.

Adapter Plate Set

Modular Window

You Have Two Installation Options

Upon purchase of a TechLink base unit, users may:

1. Install their TechLink System components.

If you will be adding your **own** connections and cables to the TechLink starter kit, Watson **cannot** install them. However, we can provide an adapter plate reference sheet. Please note: the Watson slots, adapter plate sets and modular windows that come with the base unit are compatible with non-Watson connection cables and ports.

2. Have Watson complete the installation.

Purchase any combination of the single connection kits listed below, based on your equipment requirements, and we will install them for you!

Part Numbers, Descriptions & List Prices

PART NUMBER	DESCRIPTION	LIST PRICE
TXXTECHLNK	Base TechLink unit, 5 adapter plate sets, 5 modular windows (yields 10 configurable slots)	\$200.00
TXXTECHDATA	RJ45 Cat5 / Cat6 ethernet / network data connection jack and 15' cable	\$35.00
TXXTECHPHONE	RJ11 / RJ12 phone connection jack and 14' cable	\$15.00
TXXTECHAUDIO	3.5 mm stereo audio connection port for headphones / speakers and 12' cable	\$30.00
TXXTECHUSB	USB-A female-female connection port for keyboards and mice and 15' cable	\$35.00
TXXTECHPS2	PS/2 6-Pin Pronged outlet for keyboard or mouse includes a 15' cable	\$35.00

EXAMPLE: A fully loaded Tech Link system would cost \$200 for the base unit + (\$35 per slot X 10 slots) = \$550 LIST.
