

**RELAY™**

Technology Bench

**watson**

**When overseeing critical operations**, you shouldn't have to worry about the furniture. RELAY is the responder's first choice for emergency and network operations. Flexible, modular and freestanding technology furniture, RELAY provides a power, voice, and data-driven solution for multiple applications. RELAY makes it simple to create small or large communication hubs and may be configured in modified bench applications.

RELAY unites high performance with simplicity of design. At the desktop, a large capacity cable chase neatly organizes cable and data lines under lift-up bay doors. Power is provided inside the chase and within the technology storage beneath. A mounting rail system provides flexible locations for monitor arms, privacy screens and task light mounting. Vented CPU cabinets may be specified under the desk surface or you may opt for a rotating access door to manage remote server technology cabling.

Ideal applications include:

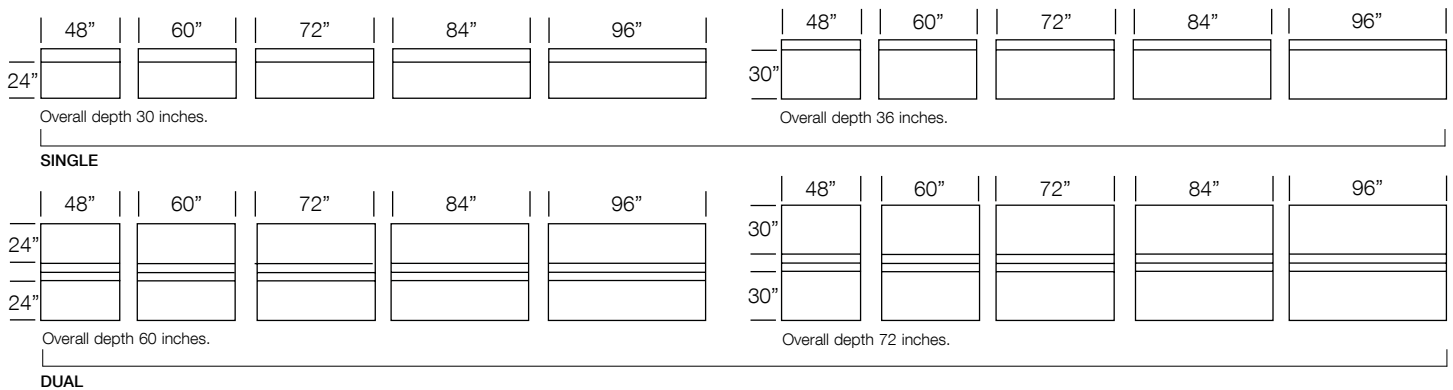

- Emergency Operations Centers
- Network Operations
- Training Rooms
- Security Operations
- Monitor-Intensive Work Environments

## STATEMENT OF LINE

RELAY offers one-sided and two-sided configurations. It is available in two versions - with CPU Storage or Remote/Blade Technology. Optional privacy screens are available in two heights and optional monitor mounts and task lights are available in various user-preferred configurations, contact Watson Customer Service for more information.

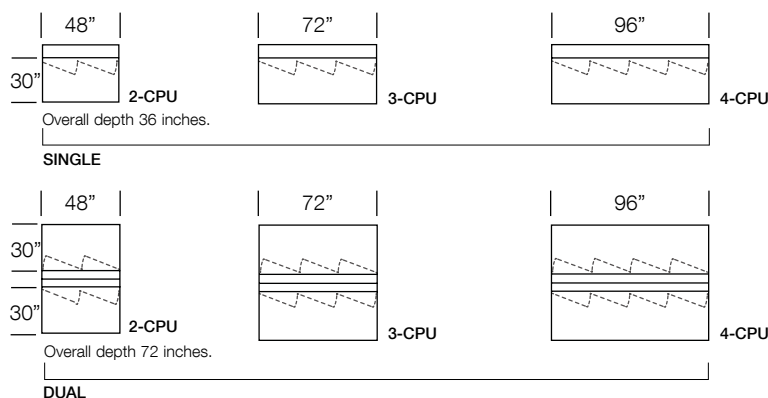

RELAY is available in all standard Watson Dispatch finishes.

### REMOTE/BLADE

### CPU STORAGE

Maximum CPU size is 9 inches wide by 19 inches deep by 20 inches high.
